presents

The Amos Memorial Lecture
East Malling Conference Centre

24 November 2009
at 3pm

‘Origin of the Apple’
including
‘A Celebration of Bramley’
by

Dr Barrie Juniper
Emeritus Reader in Plant Sciences
University of Oxford

*A general history of the evolution and spread of the apple
with special reference to Bramley’s Seedling on this
the 200th anniversary of the
planting of the first Bramley tree*

The lecture will follow an East Malling Research Association
Members’ Day on Tree Fruit

For information on both events please contact:

Dr Ursula Twomey or Penny Greeves

E-mail: ursula.twomey@emr.ac.uk or penny.greeves@emr.ac.uk

Tel: 01732 843833

Fax: 01732 849067

Amos Lectures

The Amos Lectures were established in 1947 in memory of Jesse Amos, Manager/Recorder at the East Malling Research Station. EMR continue to support these public lectures, delivered by a recognised authority in a particular field, to highlight important advances and issues in horticultural science.

Dr Juniper is an Emeritus Reader at the University of Oxford and Emeritus Fellow of St Catherine's College, Oxford. His research interests include the interaction between people, their animals and the evolution of crop plants. His talk on 'The Origin of the Apple' will fascinate those who wish to know more about the origin and natural history of the apple; apple growers, researchers and students with an interest in the genealogy of the apple, and anyone with an interest in diet, well-being, and the benevolent effects of plants on the emergence of humankind. He is the co-author of 'The Story of the Apple'.

East Malling Research

East Malling Research is an independent provider of top-class R&D serving the food chain and other sectors of the land based industry. Please visit our website for more information:

www.eastmallingsresearch.com

East Malling Research Association (EMRA)

EMRA is the knowledge transfer organisation of East Malling Research. EMRA is a subscription-based organisation, which allows members to remain at the forefront of perennial horticultural R&D and best practice. The EMRA Tree Fruit Day will feature a range of current projects at EMR including research to reduce pesticide inputs in tree fruit, pest and disease research and work tackling environmental issues.

For further details or to apply for membership, please contact:

Barbara Walsh, EMRA Secretary.
