

Genomite statement

'Genomite: New generation sustainable tools to control emerging mite pests under climate change' is a three year collaborative project that started on 1 January 2015 funded by FACCE-JPI, the EU Joint Programming Initiative on Agriculture, Food Security and Climate Change through the European Research Area-Network (ERA-NET) scheme. Collaborating institutes are East Malling Research UK (the Coordinator) Institut National de la Recherche Agronomique, France, MetasysX GmbH, Germany, Cyprus University of Technology, Cyprus, University of Amsterdam, The Netherlands, VIB vzw, Belgium, Universidad Politecnica de Madrid, Spain, Consejo Superior de Investigaciones (CSIC), Madrid, Spain and The University of Western Ontario, London, Canada.

Reference requirements of FACCE JPI

In addition to acknowledging the relevant national funders:

- For all publications and other communication, proper reference must be given to FACCE ERA-NET Plus and to FACCE-JPI and when appropriate using the FACCE-JPI logo.
- Publications must also acknowledge funding from the European Commission (EC contract 618105).
