FACCE-ERA-NET Plus
Kick-off meeting
Paris, 21.09.2015
Follow up of the projects:
Creating Impact

Heather McKhann, INRA
Plan

- Links between projects in FACCE ERA-NET Plus
- Links with other existing or upcoming FACCE projects
- Communication and dissemination
- Reference requirements
- Future related actions: policy briefs, project promotion etc.
Links between projects in FACCE ERA-NET Plus

Common kickoff meeting so all projects are aware of others and can eventually find areas of common interest for cooperation and/or coordination

Sharing of data, models, methods...
« Structure and plans for data management and data sharing within the consortium, and with the scientific community”

Common midterm and final meetings are also foreseen, and may include researchers from other projects/ actions, stakeholders...
“Projects with a modeling component should consider the on-going work of the FACCE-MACSUR project (http://www.macsur.eu/) and plan to establish links.”

Beyond MACSUR, potential areas of convergence with projects from other FACCE and FACCE-related actions

- FACCE SURPLUS (bioeconomy)
- WaterWorks2015 (water and agriculture)
- ERA-GAS (GHG monitoring and mitigation)
- SusAn (sustainable animal production)
Communication and dissemination (1)

- A dissemination plan was requested for the full proposal → Impact
- Dissemination of project results is requested in the form of various communication routes such as scientific papers, posters, stakeholder involvement, courses or training material, web based tools, workshops or direct intervention towards end users.
- Dissemination in all partner countries to national end users is necessary.
- Every project has a page on the website. These can be updated and expanded as the projects advance.
- All publications which originate from the projects, must be made available via the FACCEE website (unless subject to IPR concerns).

ERA-NET Plus on Climate Smart Agriculture

11 projects have been selected for funding.

Under the ERA-NET Plus action “Climate Smart Agriculture: Adaptation of agricultural systems in Europe” co-funded by the Seventh Framework Programme (FP7) of the European Commission, this call addresses adaptation of European agriculture to climate change in its broad sense. Four areas were highlighted as key to advancing research on genetics and breeding of animals and plants to increase resilience to climate change; pests and diseases of animals and plants linked to climate and posing significant risks; adaptive management of water and soil resources and options for adapting agricultural systems.

Following pre-proposal submission with the deadline of Monday 2nd December 2013, an eligibility check was carried out by the Steering Committee. Pre-proposals were also evaluated to assess their relevance to the scientific scope of this call, whether they match the objectives of FACCE-JPI and have a European Added Value. As a result, 40 coordinators were invited to submit a full proposal. Of the 39 received, 11 were selected for funding by the Steering Committee on July 1, 2014 following a positive evaluation by an international evaluation committee.

The indicative total available budget amounts to 18,78 M€ from 22 national funding organisations from 18 countries, and the European Commission.

Based on the outcomes of the peer review evaluation, 11 consortia have been recommended for funding:

- Climate-CAFE: Climate Change Adaptability of cropping and Farming systems for Europe
- CINDERELLA: Comparative analysis, INtegration and D ExemplaRy implEmentation of cLimate smart LANd use practices on organic soils: Progressing paludicultures after centuries of peatland destruction and neglect

For a well elaborated communication strategy, applicants are advised to take into consideration the guidelines on “Communicating EU Research & Innovation” by the EC: http://ec.europa.eu/research/social-sciences/pdf/communicating-research_en.pdf
Reference requirements

• In addition to acknowledging the relevant national funders:

• For all publications and other communication, proper reference must be given to FACCE ERA-NET Plus and to FACCE-JPI and when appropriate using the FACCE-JPI logo.

• Publications must also acknowledge funding from the European Commission (EC contract 618105).
Future related actions: policy briefs, project promotion etc.

How to create impact

- Communication of results
- Interactions with stakeholders (ideally before, during and after the project)
- Training/capacity building
- Informing policy (example of MACSUR) – policy briefs
  - USE FACCE-JPI website
